

Health Career Exploration Supplemental Activity

The occupation I am exploring is: _____

1. **Occupational Outlook.** Is this a growing, or a shrinking profession? How many jobs per year in Vermont are available in this field? Are there any postings currently available, and where?
2. **Work Environment.** In what type of practice setting(s) might you work? Are you in an office or out in the community? Is there anything unique about the work environments possible for this profession?
3. **Education.** How many years of school are needed? Is there licensure or other training beyond school? Are there schools in the VT/New England area that offer this program of study?
4. **Interest.** Does this profession interest me? Why or why not? Are there similar careers that I might be interested in?
5. **Next steps.** What could I do to explore this profession further?
